Summary

Detail-oriented Data Analyst with a B.Tech in Computer Science and experience in Python, SQL, and data validation. Proficient in analyzing structured data, investigating processing issues, and conducting exploratory data analysis. Developing skills in Microsoft Excel, Power BI, and statistical analysis to solve business challenges effectively.

Skills

Programming: Python, Pandas, NumPy	Power BI: Power BI, Power Query, DAX, Data Modeling, Measures, Calculated Columns, Dashboard Development
SQL & Databases: SQL, MySQL, SQLite, SQL Queries, Joins, Aggregations, Filtering, Grouping	
Data Analysis: Data Analysis, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Data Validation, Data Reporting, Root Cause Analysis	Microsoft Excel: Excel, Data Cleaning, Pivot Tables, Pivot Charts, VLOOKUP, XLOOKUP, INDEX-MATCH, Conditional Formatting
Data Visualization: Matplotlib, Seaborn, Streamlit, Data Visualization	Statistics: Descriptive Statistics, Mean, Median, Standard Deviation, Correlation, Basic Statistical Analysis
	Tools: Git, GitHub, Debugging, Functional Testing

Experience

09/2025 - Current **Adraasti Pvt. Ltd. - Bengaluru, India**
Internship Trainee

- Worked with Python-based application modules and ADAS computer-vision applications using SQL and MySQL for data and application workflows.
- Validated application and model outputs under varying inputs and conditions to ensure data integrity.
- Analyzed incorrect outputs and system-performance issues to identify possible root causes.
- Performed data and database validation to verify outputs, application behavior, and system requirements.
- Conducted functional testing and analyzed recurring technical issues, enhancing application reliability.
- Documented troubleshooting observations and data-processing issues to facilitate team collaboration and knowledge sharing.

Projects

Lane Departure Warning System (ADAS)

Technologies: Python, OpenCV, Computer Vision, Image Processing

- Processed real-time video data across different road and environmental conditions to analyze lane-detection results.
- Applied image preprocessing, ROI masking, Canny edge detection, and Hough Transform for lane tracking.
- Analyzed incorrect lane detections and false-positive alerts to identify potential processing issues.
- Conducted functional testing and performance evaluation across different video inputs.
- Evaluated system behavior and documented observations to improve reliability and consistency of outputs.

AI-Based Vehicle Sound Recognition System

Technologies: Python, NumPy, MFCC, Streamlit, Machine Learning

- Processed multi-dimensional audio data for classification of vehicle horns, engine sounds, and emergency sirens.
- Extracted MFCC features from audio data for machine learning-based classification.
- Performed data processing and iterative testing to evaluate classification performance.
- Applied feature and model adjustments to improve prediction performance.
- Developed an interactive Streamlit application for real-time prediction and visualization of inference results.

Email Aggregator Platform

Technologies: Python, Django, MySQL, REST API

- Developed a multi-account email management platform with authentication, email synchronization, search, and filtering functionality.
- Used MySQL for structured relational data management and transactional workflows.
- Developed REST APIs for email retrieval and processing.
- Worked with data filtering, database operations, and backend validation.
- Analyzed application workflows and troubleshooting issues during development and testing.

Netflix Clone – OTT Streaming Platform

Technologies: Python, Django, HTML, CSS, JavaScript, SQLite

- Developed an OTT-style platform with user authentication, content browsing, search, and watchlist functionality.
- Implemented database-driven content management and filtering functionality.
- Worked with structured content data and SQLite database operations.
- Developed an admin dashboard for managing platform content.

Education

06/2025

Biju Patnaik University of Technology (BPUT) Odisha
B.Tech: Computer Science and Engineering

05/2020

Khemundi Higher Secondary School Odisha
Higher Secondary: Science

Certifications

Python Full Stack Development — JSpider, Marathahalli | 2025
